ERRATA

Please note the following changes in the booklet "Homesteads".

Page 3:

1. Total number 1869 – 1900 should read 599,402 rather than 488,138.
2. Acres 1921 – 25 should read 29,652,651 rather than 29,652,650.
3. Total acres 1901 – 1930 should read 175,560,516 rather than 175,560,517.

Page 15:

1. Years at the top of the page should read

1908	1909	1910	1911

Page 16:

1. Years at the top of the page should read

1912	1913	1914	1915

The corrections as shown may be pasted in the booklet if desired.

Thank you,

INTRODUCTION

HD
1337
.L35

This booklet is issued during the Sesquicentennial of the establishment of the Bureau of Land Management and the first system of public land management, organized in 1812. This year, 1962, also marks the centennial of the passage of the once-vital Homestead Act of 1862.

This booklet contains data on the number and total acreage of homestead entries for all public land States from 1868 to 1961. The material was compiled from records of the Bureau of Land Management of the Department of the Interior.

When the Homestead Act was signed into law by President Lincoln on May 20, 1862, millions of acres of the public domain awaited settlement and development by pioneering farmers and stockmen. Each settler could claim up to 160 acres of public land. Then if he cultivated and improved the tract, built a home and lived there for 5 years, he could file final entry (called "proof") and receive title (patent) to the land.

The law became effective on January 1, 1863. There followed a burst of claims filed at various land offices of the General Land Office. Final entries began to be filed in 1868 by successful homesteaders.

As time passed, the lands most suitable for homesteading were transferred into private ownership. The rapid settlement of the rich farmlands in the Midwest forced the homesteaders farther west into the mountains and arid regions. The low rainfall and short growing season in parts of the West defeated many of the homestead efforts, and Congress amended the 1862 act several times to try to meet new and changing conditions. Still, many entries met with only limited success.

Today there are almost no remaining areas of public lands suitable for farm development. While homesteading represents a rich and vital part of U.S. history, it is now mostly a romantic memory.

The decline of homesteading in recent years is vividly shown by the statistics in this booklet. Other little-known facts are also revealed. For instance, many people will be surprised to learn that the early days of homesteading were not its heyday. More than 70 percent of all successful homesteading was done in the 20th century! More than a quarter of the total acreage was transferred to private ownership in a 10-year period during and after World War I. Virtually no land was homesteaded east of the Mississippi, and very little in the first tier of States west of the river.

The Bureau of Land Management continues to administer the little-used homestead law as a part of its reponsibilities for the management of 477 million acres of public lands under the jurisdiction of the U.S. Department of the Interior.

The rich and bountiful lands of the United States, which stretched from the Thirteen Original Colonies westward to the Pacific, have been harvested by a growing America, leaving the mountains and the deserts to the citizens of tomorrow. In recognition of the future trust, the President of the United States has called this valuable remainder of the fabulous public domain our *national land reserve.*
